

BEST-IN-CLASS ARCHITECTURAL
ALUMINIUM SYSTEMS

We Save Trees, We Build Dreams

ABOUT US

SIMTA group was established in 1991 to manufacture textile machinery and accessories. Initially, we started with manufacturing of spindle tapes and further, with a technical collaboration with C-Port JACOBI, Germany, we started manufacturing overhead traveling cleaners and bobbin transport system.

By acquiring the best manufacturing practices, we have gained good business experience in the past 25 years, SIMTA looks forward to the future and is interested in helping the subsequent generation by concentrating on energy efficiency and preserving nature.

SIMTA diversified into manufacturing eco-friendly window and door profile system, laying the foundation in 2013. We aimed to produce a sustainable range of windows and door profile system, a greener alternative to support the natural ecosystem, With superior quality & on-time delivery with excellent customer support, SIMTA has become a global leader in producing upvc door and window profile systems with a capacity of 15000TPA.

Now we are introducing Simta Astrix Aluminium System Doors & Windows

Tropica Casement SA 45000 Series

FEATURES

- Glazing from 4mm to 21mm.
- Glazing bead in round & square shapes.
- Glazing from inside for security.
- Corner joints & T-joints for stronger mechanical joiners.
- Co-extruded gaskets which can withstand -30°C to +50°C.
- Single point to multi point locking system.
- Smooth and effortless in operation.
- Designed for larger openings and high wind load conditions.
- Available Anodized, Powder coated and decoral wood finish.
- Internal and external opening ,Top hung, Pivot, Tilt' & Turn window possible.
- High performing Doors & windows.

Aluminum profiles produced by leading extrudes in alloy 6063 T6 Temper as per IS-6477 1983 for dimensional tolerance and IS-1285 1975 for chemical composition & Mechanical properties.

Dedicated punching machine and tools is used functions for precision and consistency.

Tropica Sliding Smart SA 26000 Series

FEATURES

- Glazing from 4mm to 18mm.
- Single roller capacity 30kgs shutter.
- Adjustable double roller capacity 65kgs shutter.
- Wool pile with silent fin for dust resistance & better sound reduction.
- Smooth & Effortless in movement.
- Automatic & Manual locks.
- Provision for insect screen.
- Reinforced profiles available for larger openings and high wind load conditions.
- Available in anodized, powder coated and decoral wood finishes.

Ideal for windows upto 1800mm height
